

Bachelor of Arts in Manufacturing Management

College of Business & Public Administration

You've earned your A.A.S. in a manufacturing discipline and have completed at least 27 hours of technical coursework. Now take your education and your career to the next level with a **Bachelor of Arts in Manufacturing Management**.

Foundation for Success

Employers have a growing need for workers who possess high levels of both technical and managerial skills. The manufacturing sector today is a cutting edge, technology-driven industry in need of a new generation of workers who are capable of operating complex machines, leading others effectively, thinking critically and solving problems creatively.

Outstanding Preparation

The Bachelor of Arts in Manufacturing Management is the perfect next step for students who graduate from a manufacturing program at community colleges. The Bachelor of Arts in Manufacturing Management is a career-oriented program that prepares students to become industry professionals capable of successfully managing human, mechanical, technological and financial resources in a manufacturing environment.

Facts

U.S. companies can't fill an estimated 600,000 positions in the manufacturing sector that require post-secondary education (The Manufacturing Institute, 2011). Due to this growing skills gap, the number of unfilled manufacturing jobs may reach 3 million by 2015 (The Society of Manufacturing Engineers, 2012).

Accessible Program

Convenience is key to a successful education in today's world. Courses in this degree program are offered online and on campus, making it easy to complete your bachelor's degree on your schedule.

Assurance of Quality

Business accreditation creates the impetus for relevancy and currency of our faculty, programs and courses to best serve our students.
