This workshop will arm administrators with the research and strategic tools needed to implement academic, social and emotional learning throughout their districts. Learn how to improve conditions for learning and student growth:

- address the Illinois Standards for Social and Emotional Learning (SEL);
- understand the research that supports implementing SEL into your district and school practices and policies;
- understand the structural and strategic supports that improve conditions for learning; and
- assess the current levels of SEL implementation in your buildings.

At the end of this workshop, you will develop a one-year plan outlining next steps to address implementing SEL throughout your district and schools.
