During our February Council meeting, we had two individuals in recovery share their stories. One man discovered while on his recovery journey, he could not find any support groups for SPICE. He understands the trials and tribulations of SPICE addiction and recovery. He came to the ROSC to share his desire to launch a support group to fill the gap in McLean County.

The other man shared his struggles with multiple addictions and his non-linear recovery path. How addiction affected his family, personal, and professional life. He shared a message of newfound depth and appreciation for recovery life, and not to give up. There is a plethora of community resources available to help one stay on their recovery journey.

Both heart-felt stories that send a message of hope, empowerment, and we need to stay connected to each other. This is the spirit of the ROSC. To connect those seeking services and supports to get help sustain their recovery in their communities or to support a loved one on their recovery journey.
