NARCAN is a prescription medication that can block or reverse the effects of an opioid overdose. Anyone can easily use NARCAN to save the life of someone overdosing on opioids, including heroin or prescription medicines like OxyContin® or Percocet®. If you or your agency would like to receive additional training on using NARCAN, please get in touch with the Edgar County ROSC at ambrosiar@hourhouserecovery.org, the CARE Coalition at 35ahamilton@gmail.com, HRC at 217-465-4118, or the ECPHD at 217-465-2212. If you or someone you know is overdosing and needs immediate attention, please call 911. In the instance you are with that individual, the Good Samaritan Law states that anyone who calls for help or drops off someone experiencing a drug overdose will not receive charges for possession of paraphernalia. One limitation of this law is that the person who overdosed is not covered, and any other crime committed at the scene is not protected by law.
