

## **January ROSC Meeting Status**

The January ROSC meeting was cancelled due to severe weather conditions that resulted in multiple locations being closed. Because the weather-related closures occurred near the end of the month, there was not an available window to reschedule the meeting within January. As a result, no formal coalition meeting was held during this reporting period.

To ensure continuity, all agenda items and discussion topics originally planned for the January meeting will be incorporated into the February ROSC meeting. The February session will address both January and February priorities, allowing the coalition to remain on track with planned activities, updates, and collaborative efforts.
