The March meeting for the Peoria County ROSC was a huge success. We had many sectors represented. The presenter was Sierra Garza, the Trillium Place coordinator/Carle Health manager for the Addiction Recovery Center in Peoria. Sierra presented information on the ARC facility. Sierra's topics included a virtual tour of the facility, potential wait times, ideal candidates, and other vital information. Sierra also discussed the outside recovery meetings that come into the ARC. She also described what a typical day and night looks like for individuals enrolled in the ARC program. Sierra also highlighted the alumni group that meets at the ARC. This is a group that is specifically run and attended by graduates of the ARC program. The ARC is also MAT/MAR friendly. This is an essential part of the Peoria County ROSC's Strategic Plan. An information packed Q & A session followed the presentation. Many members found Trillium's services extremely beneficial to the communities they serve and an essential pathway to promote many types of recovery. The Peoria County ROSC explored ideas to gain more members of our underserved sectors from youth and media. We also introduced and highlighted new members. These organizations included Heartland Health Services, MedMark Treatment Centers, Hult Center for Healthy Living, and more. Council members gave insight and suggestions for community outreach and promotion of the Peoria County ROSC council. We are very excited about the momentum and trajectory of the Peoria County ROSC, which serves an area of Peoria, Tazewell, and Woodford Counties.
