Connect with a Better Laundry Experience

Laundry won't do itself, but CSC Digital Laundry comes close.

CSC Go™ Mobile App

At the heart of the CSC Digital Laundry system is our CSC GO Mobile app. It provides residents with a convenient way to check machine availability, receive cycle alerts and even request service all from their mobile device!

The CSC GO app provides residents with a convenient way to check machine availability, receive cycle alerts and even request service (unlike other apps) all from their mobile device!

Students can:

- **Check** laundry status through real-time machine availability
- **Request** service directly through the app
- **Receive** alerts when a laundry cycle is complete
- **Track** laundry usage
- **Automatic** service is dispatched on machines that detect a factory fault code

How It Works

Your students will enjoy a seamless, convenient laundry experience, and you will receive up-to-date information about your laundry room performance. That's because we use a highly advanced—but easy-to-use—set of devices and technologies that work together behind the scenes through a common back end. The graphic below illustrates how it all works!

Modern Convenience

Vital information can be shared with students, allowing them to save time and support overall safety and social distancing efforts.

Equipment Monitoring

Service systems remotely monitor machine health and initiate communication with certified technicians while capturing all service requests and resolutions.

Real-TIme Reporting

Access real-time reporting on laundry room performance, service quality and resident satisfaction.
