2026/2027 COMMUNITY RESOURCE GUIDE

Recovery Oriented Systems of Care

Ogle/Dekalb ROSC

Lead Agency:	Coordinator:
Sauk Valley Voices of Recovery	Jacob Albers

Who We Are

The Illinois ROSC Council (Recovery-Oriented Systems of Care Council) is a statewide collaborative network dedicated to promoting and strengthening recovery support systems for individuals and families affected by substance use and mental health challenges. The council brings together representatives from recovery community organizations, treatment providers, public health agencies, and people with lived experience to guide policy, share best practices, and ensure that recovery services are accessible, person-centered, and sustainable across Illinois.

The ROSC Council's mission is to foster a culture that values recovery as a lifelong process and supports multiple pathways to wellness. By coordinating efforts at both state and local levels, the council works to reduce stigma, expand recovery resources, and build strong community partnerships. Ultimately, the Illinois ROSC Council strives to create an inclusive recovery-oriented system where every person has the opportunity to achieve and sustain long-term recovery.

2026/2027 Community Resource Guide

Summary

Ogle/Dekalb ROSC

The Dekalb Mental Health Board did a deeper study to access Mental Health/Substance Use Disorder in their survey "Collaboration for Equity and Belonging in Behavioral Healthcare Committee (2023). They took multiple factors into consideration such as race, age, gender, ethnicity etc. According to the respondents and their results, they would like to see more support or peer groups, an inpatient/outpatient treatment center and partial hospitalization programs. This is consistent with the Community Needs Assessment that we did, as far as the need for in-patient treatment. We did not ask any questions about peer led groups or partial hospitalization programs; however, this gives us more information to utilize for our next assessment for the needs of the community. In this survey many respondents had also expressed having negative experiences seeking help in the past and the feeling that the language barrier matters when referring to mental health issues.
