

New Version of Blackboard to be installed in December

Box View:

This inline grading software replaces the old Crocodoc. New Box offers several improvements over Crocodoc, including support of over 100 different file types, videos/images displayed, and print function. One downfall is users can download a copy of the student file, but annotations will not appear. Mobile Compatible Tests:

This feature is very limited. When building this test, instructors can only set availability dates, a due date, a password, a number of attempts and a default question value. The interface of the test, for students, is very similar to a regular test. Mobile Compatible Tests are not Force Completion. If a student was kicked out of a test, they would be able to access from where they left off to finish their attempt.

Collaborate Ultra:

Collaborate Original Experience has been available for several years. Blackboard has updated their software, which is much simpler. Users no longer have to download a launcher to enter a session. Click a link to open a session in the browser.

Collaborate Ultra Help for Moderators: <https://help.blackboard.com/Collaborate/Ultra/Moderator>

Instructor App:

The Blackboard Instructor app allows instructors to view course content, connect with students in discussion board forums, and more.

BB Grader App:

The BB Grader App allows you to review, provide feedback and grade student assignments. Instructors may only grade assignments.
